

- Orange: Digital In/Out ports (all support PWM)
- Dark Orange: Digital Input ports
- Blue: Analog Input 12 bits, 0 to 3.3V
- Purple: Analog Output 8 bits, 0 - 3.3V
- Green: Capacitive Touch Sensor ports
- Cyan: I/O -pins from RTC ultra low power processor, usable in deep sleep mode
- Pink: SD card interface
- Red: SPI bus for Flash-memory, do not use

The following pins show the default assignment. All these signals can be changed to any In/Out port. This applies also to UART0 and UART1, which cannot be accessed in the default assignment.

- Grey: I2C bus (Wire)
- Light Green: VSPI bus
- Dark Brown: Serial interfaces
- Light Blue: HSPI bus
